

Pioneer Balloon

ACTIVITY

Set Up

You'll need two straws, a balloon, a string and some tape. First, tape the pioneer printable to one of the straws. Blow up the balloon, (twist and clamp the end) and tape to the second straw. Secure the string from one wall to another with the straws threaded onto it.

How To Play

Lets help the pioneers get to the other side! Lead the primary in singing the songs and in between songs, see how far the pioneers will make it across the room. Use 1 big balloon as a new experiment each song, OR use a smaller balloon and have the pioneers only go part way each time-eventually making it the end. The balloon will need blown up each time OR you could have multiple balloons ready to tape on.
